The Proving Ground

2013 TRIAL RESULTS

A MESSAGE FROM MARC HUTLET SEEDS LTD.

MARC HUTLET
Owner/Operator
(204) 326-7104

Our team is proud to release the 2013 Proving Ground weigh wagon results for grain corn, silage corn, soybeans, canola and sunflowers from our area. The 2013 crop year can only be described as 'one to remember' as record yields were harvested on numerous fields in many different crop types.

The evidence of this is a record-smashing 30 Yield Challenge winners in grain corn in 2013. For the first time ever, three strips were recorded at over 200 dry bushels per acre! There were also 13 soybean Yield Challenge winners along with one canola Yield Challenge winner as 46H75 establishes itself as a leader hybrid. All these producers will be rewarded for their achievement with 20 acres of free seed in 2014.

This yearly booklet is only possible because of all the cooperators who take the time during our frenzied planting season to plant these trials. These trials in turn produce real-world field scale results which help our team aid producers in making the best decisions when selecting hybrids and increasing yields. THANK YOU ONCE AGAIN TO ALL OUR TRIAL PARTICIPANTS.

Pioneer Hi-Bred Ltd. will launch an array of new products in 2014 including 4 new soybean varieties; 63ME80 sunflowers; 55V50 alfalfa; P7632AM, P7632HR, P7632R, P8210R, P8673AM and P8906AM corn hybrids and a revolutionary new alfalfa silage inoculant, 11AFT.

In order to better serve our customers, our facility has undergone a major renovation and addition. Marc Hutlet Seeds Ltd. is building a new office (as illustrated on right) as well as increased warehousing that will be complete by year's end. These improvements will create room for a full-time office position which will be finalized soon.

The first pay period was a tremendous success indicating a strong signal that our team, genetics and programs are helping our current customers as well as many new ones grow more bushels. Don't miss out on your last opportunity to lock in your input costs for the year! **Buy now and get the same price until seeding is over!** No other company offers such a rewarding program. For those of you who booked a month ago and have acres to add - this is a great time to secure your supply as the top corn hybrid supplies grow tighter.

Our team is ready to be your trusted advisor and local experts. Local producer grown and managed trials provide the information you need to get the right product for the right acre.

Thank you for your continued support.

Marc Hutlet

DUPONT
PIONEER.
Looking for expert corn advice?
Step into our office.
You won't find a Pioneer Hi-Bred sales representative with their feet up in some office building. That's because they'd rather be out walking the fields with you, discussing your crop, your conditions and your challenges. This unique grower-to-grower approach has made the DuPont Pioneer team more than just leaders in the corn business. It has made them leaders in the relationship building business as well.
Pioneer® brand products are provided subject to the terms and conditions of purchase which are part of the labelling and purchase documents.

What does it take to be a Yield Challenge Winner??

The 2013 Proving Ground results are a direct result of our side by side challenge and helps Marc Hutlet Seeds deliver the most accurate local data available. Many producers in the area work very hard to help us collect yield trial data every year and the Yield Challenge is one of the ways we show our appreciation. Any producer that purchases 80 acres or more of seed from Marc Hutlet Seeds is automatically entered to win. All you have to do as a grower is plant your Pioneer Hi-bred product in a side by side against another Pioneer Hi-Bred product or against a competitor.

At harvest time, one of the members of our team will measure at least 1000 feet in length of either 4 rows wide of corn or 20ft wide for soybeans and canola. After you harvest and weigh those strips, we calculate yield. If one of your strips yields more than 160 bushels for dry corn, 40 bushels for soybeans or canola, you win 20 acres of free seed for the following year!

- **Customer must purchase minimum of 80 acres of corn, canola or soybean seed**
- **All trials must be weighed with a Pioneer Hi-Bred weigh wagon.**
- **Strips must be side by side and at least 1000 ft long and 4 rows(corn) or 20ft wide(soys)**
- **Trials can be Pioneer Hi-Bred vs. Pioneer Hi-Bred or vs. a competitive product.**
- **Customer can have only one trial per crop qualify for the program.**

Thank you.

MARCUS DUECK
SLV Technician /Silage Inoculants Specialist
(204) 371-1124

Marc Hutlet Seeds strives to provide our dairy producers with the most accurate and local data possible to help you make profitable decisions on your dairy farm. The dairy industry is very important to us and we have increased our focus and resources to better serve all of our producers locally.

This year we had 3 corn silage plots spread throughout the area which were all weighed and analyzed for their nutritional value. These results tell us the overall quality, maturity, and volume of the corn silage and together we can figure out the milk/ac value for each hybrid. This will help all dairy producers decide which products are best suited to helping them maximize profitability on their specific farm.

One question that our team is frequently asked is "should I use silage inoculants?" In order to help prove how to increase the value of your silage even more, we have started several silage inoculant trials this year in our area. These results will be distributed at our dairy specific meeting to be held later this winter.

Thank you,

Marcus Dueck
